# Take home a free book!

How we choose to handle the waste we generate affects our natural resources, and the humans, plants and animals that rely on them. In the spirit of “reuse, reduce and recycle”, NSCRCD is offering you the opportunity to choose a gently used book from our collection so you can learn more about natural resource conservation after you leave today’s event.

If you later decide not to add the book to your own library, please re-gift it, add it to a “little free library”, or donate it to a local library association or thrift store.

# Grow It, Save It!

*Looking for something to add excitement and interest to your gardening hobby? Try raising and saving your own seeds!*

Saving seeds is a time-honored tradition that many gardeners are rediscovering. Anyone can become a successful seed saver — the only limitations are your time, space, and interest. And the benefits of growing and storing your own seeds are many:

- Save money on expensive yearly seed bills.
- Select seed from plants that have thrived in your particular growing conditions.
- Preserve old-time and regional favorites, including heirloom vegetables and flowers that your grandparents grew.
- Share seeds from your favorite flowers and vegetables with family, friends, neighbors, and other gardeners.

Detailed seed information for each vegetable and flower gives you everything you need to know about how to raise, harvest, and store seeds for a lifetime of fruitful home gardening.

---

*"This compact, clearly written book is packed with common sense advice including how to pollinate, how to avoid unwanted crosses, and which plant qualities to look for. Novice and skilled gardeners alike will wish to experiment with this rewarding and satisfying practice."* — LIBRARY JOURNAL

*"Here in one compact paperback is all you need to know about growing garden plants from seed."* — NEWARK STAR LEDGER

Please accept this gently-used natural resource conservation book from the North Santa Clara Resource Conservation District. When you are finished with the book, please donate it back to your local library association or nonprofit thrift store.
