Dear community stakeholders, partners, and colleagues:

The County of Santa Clara Office of Sustainability is developing a Watershed & Community Resilience Tool, funded by the National Fish & Wildlife Foundation (NFWF). The map-based tool will help to determine where to implement nature-based approaches to **reconnect** critical areas of Santa Clara County watersheds to reduce the impacts of climate-related flooding, extreme heat, and sea level rise and to **increase community resilience**, particularly in socially vulnerable areas.

We are reaching out because your organization actively works in the climate resilience realm, and we would really like your input on how we can make this tool of value to you. Please join us for a listening session to learn more, discuss the challenges you face when planning and implementing climate resilience solutions, and provide input to the project and its implementation. Anyone from your organization relevant to this project is welcome to join. Help us make this tool useful for you and your project partners!

The listening sessions will be held on one of the following dates:

- Tuesday, April 30, 12 - 1:30 pm
- Thursday, May 2, 10:30 am – 12 pm

**Please fill out your availability for those two dates in our [Doodle poll](#).**

The attached information sheet includes more information about the project. Please reach out if you have any questions.

Warm wishes,  
Janny
