Planning Policy for Bayshore Climate Hazards

Monday, October 30, noon-1:30 (BYO lunch)

In-person at the Peninsula Conservation Center

3921 East Bayshore Road, Palo Alto

Online via Zoom

[Register here](#) for either option

Len Materman, Chief Executive Officer, San Mateo County Flood and Sea Level Rise Resiliency District, also known as OneShoreline

Len will discuss OneShoreline's Planning Policy Guidance, which was adopted by its Board in June 2023. The Guidance is a standardized, yet evolving, resource for cities and the County to account for climate change driven flooding, sea level rise, and shallow groundwater rise in general and specific plans, zoning ordinances, and approvals of private development projects in areas near the Bay. In 2024, OneShoreline plans to come out with similar future conditions related guidance for public infrastructure projects. [More info here.](#)

Kevin Gardiner AICP, Community Development Director, City of Burlingame

Kevin will talk about how and why the City of Burlingame worked with OneShoreline to develop zoning development standards for its shoreline areas, and ultimately put the Planning Policy Guidance into practice.
