

The Collaborative Steering Committee role would include:

- Compiling Subcommittee input
- Integrating Subcommittee input into long range planning, and short term project descriptions
- Locating and organizing partnerships, collaboration and funding to implement riparian enhancement projects
- Overseeing development of a monitoring plan, including:
  - Clear description of desired outcomes (objectives)
  - Indicators of progress toward and achievement of those objectives
  - Measurement parameters for those indicators
  - Reporting on progress
  - Overseeing review and any necessary adaptive management of process and methods to continue progress
- Guiding an annual assessment of the program, its achievements and areas of needed improvement or change
